"You don't crave broccoli, and our generation is growing up craving Big - Mack"

"I get tired feeling like a failure!"

"We have to save our children!"

"It's not always the person with best cards who wins the game. What matters is how well you play the hand you're dealt" - Genes vs. Environment.

If you were to put the community's you work in obesity rates on the map, name the area you think it would show the highest rate? Why did you pick this area?

What kinds of changes does your community need to make to improve its health? How can we go about making those changes?
